

SEMINAR 5: 30 Hours

Since 2018, this has been the joint education curriculum of IFMANT, SANTH, IGNH, ÖNR, and BNR, among others.

No	Topic	Theory	Practical
A. CORE TOPICS			
<i>Axial organ, facet joints, joints, peripheral nerves, cervical disorders. Practical applications: urogenital region, joints, peripheral nerves, tonsils.</i>			
1	Anatomy, topography, and physiology of the spine and spinal cord	2	
2	Evaluation of the spine from the perspective of the ANS	1	
3	Segments of the spinal system and their relationship to internal organs	2	
4	Relationships of the spinal system and fascia with the ANS	1	
B. SPECIAL SECTION			
5	Locomotor system diseases (continued) / lower extremities	2	2
6	Examination of the sacroiliac joint and pelvic region and the Neural Therapy approach	1	2
7	Circulatory disorders, treatment of varicose veins and venous leg ulcers	1	2
8	Injection techniques on the spine	2	2
9	Evaluation of procaine injections near the spinal cord	1	1
10	Practical exercises among course participants	1	1
C. SUPPORTIVE EDUCATION			
11	Comparison of Neural Therapy with allopathic treatments, surgery, and orthopedics	2	
12	Facet joint and spinal nerve root injections	2	2
13	Assessment and questions		
Total duration of Seminar V		16	12

D. TEACHING MATERIALS AND RESOURCES

Recommended resources for high-quality education:

- 1 Prof. Dr. Hüseyin Nazlıkul, Neural Therapy – Neurophysiology, Ground System, Interference Fields, Autonomic Nervous System, Injection Techniques and Treatment Recommendations, Nobel Medical Bookstores, 2nd Edition, Istanbul 2015
- 2 Prof. Dr. Lorenz Fischer, Neural Therapy – Neurophysiology, Injection Techniques and Treatment Recommendations, Translated by: Prof. Dr. Hüseyin Nazlıkul & Prof. Dr. Yusuf Tamam.
- 3 Prof. Dr. Hans Barop, Neural Therapy Pocket Atlas, Translated by: Prof. Dr. Hüseyin Nazlıkul
- 4 James W. McNabb, Practical Guide to Joint and Soft Tissue Injections, Translated by: Prof. Dr. Hüseyin Nazlıkul & Prof. Dr. Yusuf Tamam, Kongre Kitabevi, 2018 Antalya

Neural Therapy is a comprehensive, high-quality course of education covering neurophysiology, the ground system, interference fields, the autonomic nervous system, injection techniques, and treatment recommendations. No teaching materials are provided for the seminars and lectures. For the full depth of the curriculum, the books by H. Nazlıkul, L. Fischer, and Hans Barop cover this material. The complete set of these books can be obtained from the BNR association.
