

SEMINAR 8: Clinical Observership and Case Seminar - 30 Hours

This seminar may be taken after completing the initial core seminars

No	Topic	Theory	Practical
A. CORE TOPICS			
1	Approach to internal diseases (abdomen, stomach, liver, gallbladder, pancreas, small and large intestine)	2	2
2	The Neural Therapy approach and practical applications in gynecological and urological diseases	2	2
3	The Neural Therapy approach in neurological diseases	1	1
4	The Neural Therapy approach in dermatological diseases	1	1
5	The Neural Therapy approach in cardiac and thoracic diseases	2	2
6	Examination and the Neural Therapy approach in pelvic and TMJ dysfunction	1	2
7	In orthopedic, physiotherapeutic, and rheumatological diseases: locomotor system disorders; diagnosis and Neural Therapy treatment approach for upper and lower extremity problems	1	2
8	The post-Neural Therapy approach in surgical conditions	1	1
9	Ganglion coeliacum	1	
10	Neural Therapy in complex diseases	1	2
11	Assessment and treatment of myofascial trigger points and referred pain	1	2
12	Combining Neural Therapy with other treatment methods	1	
13	Assessment and questions		
Total duration of Seminar VIII		15	15

B. TEACHING MATERIALS AND RESOURCES

Recommended resources for high-quality education:

- 1 Prof. Dr. Hüseyin Nazlıkul, Neural Therapy – Neurophysiology, Ground System, Interference Fields, Autonomic Nervous System, Injection Techniques and Treatment Recommendations, Nobel Medical Bookstores, 2nd Edition, Istanbul 2015
- 2 Prof. Dr. Lorenz Fischer, Neural Therapy – Neurophysiology, Injection Techniques and Treatment Recommendations, Translated by: Prof. Dr. Hüseyin Nazlıkul & Prof. Dr. Yusuf Tamam.
- 3 Prof. Dr. Hans Barop, Neural Therapy Pocket Atlas, Translated by: Prof. Dr. Hüseyin Nazlıkul
- 4 James W. McNabb, Practical Guide to Joint and Soft Tissue Injections, Translated by: Prof. Dr. Hüseyin Nazlıkul & Prof. Dr. Yusuf Tamam, Kongre Kitabevi, 2018 Antalya

Neural Therapy is a comprehensive, high-quality course of education covering neurophysiology, the ground system, interference fields, the autonomic nervous system, injection techniques, and treatment recommendations. No teaching materials are provided for the seminars and lectures. For the full depth of the curriculum, the books by H. Nazlıkul, L. Fischer, and Hans Barop cover this material. The complete set of these books can be obtained from the BNR association.
